DC GARAGE DOORS | DOOR STYLES & COLOURS

FIND YOUR FIT

Three ways to open up.

Start with how you use the building, then discuss the opening, operation and finish.

77 mm residential roller

Insulated aluminium profiles that roll above the opening. A practical starting point for domestic garage projects.

95 mm industrial roller

An insulated steel-profile option for commercial and industrial openings, with agricultural and larger domestic uses to discuss.

Insulated sectional

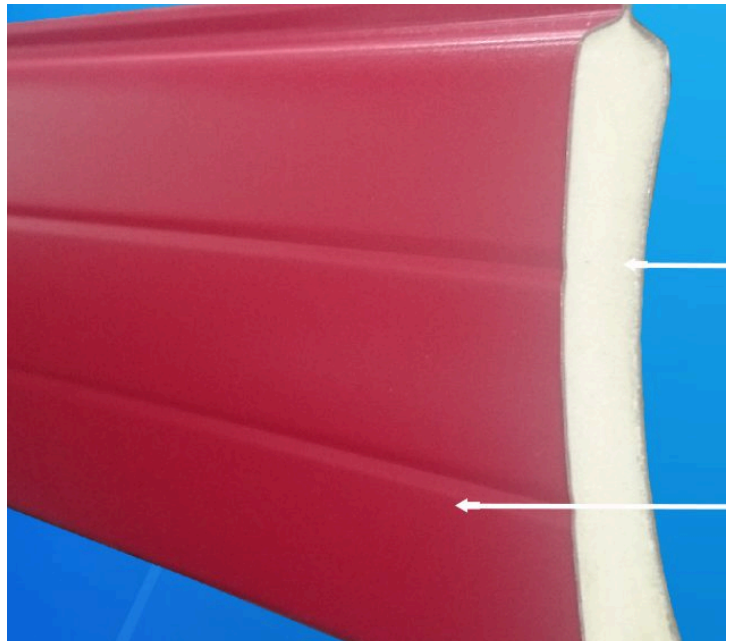

Panelled doors with flush, narrow-rib or mid-rib styling. Track layout and internal clearance must suit your garage.

The 77 mm and 95 mm labels identify roller profiles. They do not state the insulation thickness or guarantee a whole-door thermal rating.

RESIDENTIAL ROLLER DOORS

Compact. Insulated. Practical.

77 mm insulated aluminium roller door range

Built around your garage

- + Foam-filled aluminium laths.
- + The curtain rolls above the opening; available headroom and side clearance need checking.
- + Electric operation with a manual override arrangement for power failure.
- + A sealed bottom edge and brush-sealed guides form part of the range.

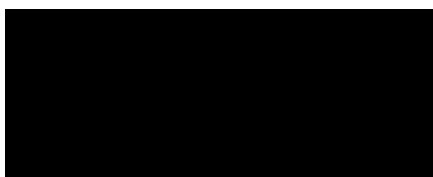

Choose the operating package

Ask about remote controls, full box canopy, safety edge, photocells, external winding and keypad options. Confirm which are included in your quotation.

77 MM ROLLER COLOUR GUIDE

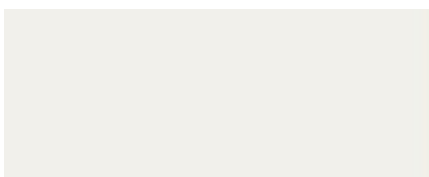

Choose your finish.

Explore colours and finishes for your residential roller door.

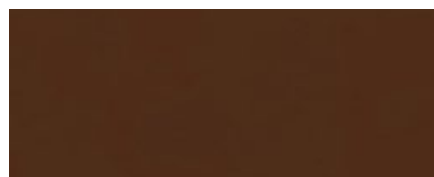

Black

RAL 9005

White

RAL 9016

Brown

Blue

RAL 5011

Anthracite

RAL 7016

Silver

RAL 9006

Mahogany

Laminate finish

Golden Oak

Wood-effect finish

Confirm with a physical sample

Printed and screen colours are approximate. Woodgrain and metallic finishes cannot be represented by a flat colour alone. Availability and finish must be confirmed for the selected door.

95 MM INSULATED ROLLER DOORS

Ready for working spaces.

A robust profile for commercial, industrial and other suitable openings.

Discuss the job, not just the size.

- + The range uses PVC-laminate-coated steel with polyurethane insulation.
- + One-piece laths, brush-carrier side guides and a sealed bottom rail.
- + Window laths and wind-lock details are shown as options to discuss for the specific installation.
- + Tell Damien about access frequency, machinery clearance, exposure and the building structure.

Agree the final specification

Motor, controls, safety devices, guides, framework and installation requirements should be identified in the quotation. No maximum size or wind rating is promised by this guide.

95 MM ROLLER COLOUR GUIDE

Colour with character.

Keep RAL, BS and nearest-match references distinct when ordering.

Solent Blue
BS 18 E53

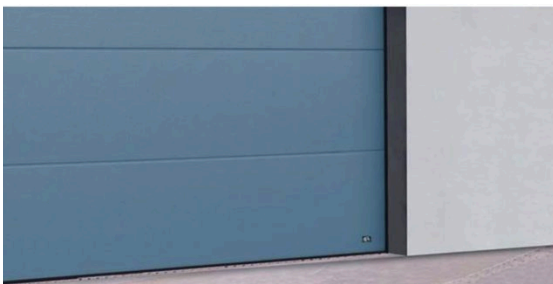

Sargasso
Nearest RAL 5003

Printed and screen samples are approximate. "Nearest RAL" is an approximation, not an exact RAL match. Confirm the finish and availability against a physical sample before ordering.

INSULATED SECTIONAL DOORS

Style beyond the surface.

Three panel designs, with window and handle choices to discuss.

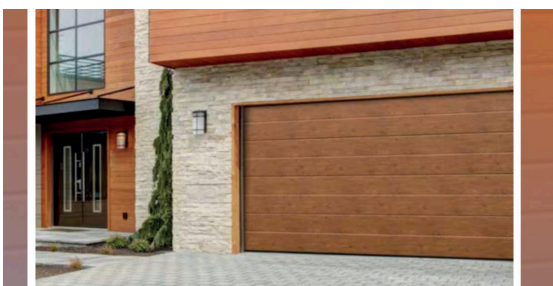

Flush

Flat panel styling. Smooth, woodgrain and stucco surfaces.

Narrow rib

Evenly spaced horizontal ribs, shown in stucco or woodgrain finishes.

Mid rib

A central groove in each panel creates the appearance of broader timber boards.

Finish references: Flush options include RAL 9004, 7016 and 9016. Narrow-rib options include RAL 9005, 9016 and 7016. Mid-rib options include RAL 9005, 7016 and 9016, plus Golden Oak and Mahogany woodgrain at extra cost.

The range features 40 mm foam-filled steel panels. Special RAL colours, automation, windows and handles are subject to the chosen range and quotation. Check internal track space before deciding.

YOUR NEXT STEP

Let's talk about your door.

A few details will help Damien start the conversation.

01 Your location

Town / county and whether the building is a home, business or farm.

02 Photos of the opening

A clear photograph from outside and inside, including the area above the opening.

03 Approximate dimensions

Opening width and height, plus any known headroom or side-clearance limits.

04 Your preferred style

Roller or sectional, colour reference, finish, windows and operating preferences.
